

# STONY PLAIN SUN.

VOLUME FOURTEEN

STONY PLAIN, ALBERTA, THURSDAY, MAY 10, 1934

Whole No. 711

## ROYAL CAFE, STONY PLAIN.

(Phone 33)

Where Good Food and Good Service Meet.

Delicious Food, Homemade Desserts, Distinctive Fountain Drinks.

Quality Foods at Very Reasonable Prices.

FIRST-CLASS FURNISHED ROOMS TO RENT.

**L. M. LARSON, Proprietor.**

Most Especially Conducted

The Captain and the crew, the ship's Doctor, and more particularly the kindly, motorny stewardesses of the Canadian Pacific liner Montclare all shared the responsibility of personally conducting the recent trans-Atlantic journey of Mary Estella Barr, of Halifax. Mary Estella has six months of very active life behind her, and the best wishes of the Montclare's personnel for many happy years to come. The journey was necessary because Mary Estella is motherless, and her father, Peter Barr of Halifax, though unwilling to part with his baby daughter, yielded to the wishes of his parents in Leith, Scotland, to send the baby to them. Her grandparents met her at Glasgow.

## THE SUN BOOK SHOP.

School Supplies Our Specialty.

**Examination Cap**—8x13 in. Standard size, white wove, medium weight, extra fine quality, ruled both sides; used at all school exams; 500 sheets in package, **\$1.15** per package.

### Exercise Books (Ink) Reeves's Paints

Prices range from 16c for the best, to 3c.

### Scribblers (Pencil)

Prices from 2½c up.

### Waterman's Ink

in 2 oz., and pints & quarts. Also Peerless and Reliance.

### India Ink

Reeves's ½-oz. 19c.

### 'Regulation' Note Book

with Rings, Refills for same, and also Gummed Reinforcements.

WE TAKE ORDERS FOR TEXT BOOKS ISSUED BY THE DEPT. OF EDUCATION; AED ALSO FOR ALL BOOKS ISSUED BY THE INSTITUTE OF APPLIED ART, EDMONTON.

50c. a box. Refills for same, every color.

Crayons

From 5c up.

### Drawing Pads

No. 1 and No. 2.

### Pencils,

a large variety on hand, at low prices.

### Chalk.

Sanigene, Excelsio, etc., in boxes of 1-gross.

### Tennis Notes.

The annual meeting of the local tennis club was held in the Town Hall on Friday last. The usual number of members turned out, and the club is ready for the season 1934.

The following officers were elected:

President—L. Oatway.  
Sec. Treas.—P. Comisarow  
Committee—M. Clarke  
E. Malloch  
H. Oatway

The fees for the coming season were set as follows:  
Ladies and men—\$1.00  
Beginners—50 cents

Beginners are now permitted to play after six o'clock P. M.

The committee are now selling tickets, get yours now and avoid the rush.

The courts are being put into first class shape, and it is expected the season will be officially opened in the middle of the month with a tournament. A good year is expected.

### On the Skids.

And now, another of Stony Plain's old landmarks is due for removal—or demolition; this time it being the old Canadian Northern Ry. station on Main street, opposite the Pool elevator. The railway company is said to have decided to have this corner lot cleared free of buildings, and is offering the old station building at a very reasonable price, to be removed within 30 days of the sale. It is not the intention of the railway company to sell any of the land in that sector, this area being held as potential sites for grain elevators or other buildings, as sites for these may be required.

### Ban on Highway Traffic.

The ban on truck and bus traffic on the highway, issued on the 1st by the Dept. of Public Works did not stay on long for the stretch between Stony and the City. The ban on this run was lifted after a few days, when it was found that trucks half-laden did not disturb the roadbed.

The latest ban included the use of trailers, as well as that of truck and bus. This appears to be quite proper, as it was found that a 2-wheeled trailer laden with up to a ton weight was more destructive to the highway than a six wheeled truck with half-a-load. The entire traffic ban is due to be removed by Tues. next, the 15th.

### The Tractor-drawn Grader

The experiment of having the tow-a grader drawn by tractor power has proven very successful. The experiment was made on Friday last, when the Main St. pavement and side roads were graded by the tractor driven by Mr. Louie Wudel. This scheme dispenses with the services of one man, as heretofore the six-horse team required two drivers.

## HARDWICK'S

### Ladies' Spring Hats.

Latest Styles; Hardwick Prices.

Ladies' Rayon Silk Sox, in a regular assortment of colors; sizes 8½ to 10. 25c. per pair.

Children's Fancy Colored Socklets; assorted colors; 19c. pair.

New Shipment of Women's Snappy Style Sport Pullover Sweaters; sizes 34 to 42; \$1.49.

Women's Sport Oxfords; leather heel, rubber tip; sizes 3 to 7; \$2.95 pair.

Men's Fancy Striped Broadcloth Shorts; 30 to 38 waist; per pair 39c.

Grocery Specials; Lots of them.

## Get It at HARDWICK'S.

## Simpler Problems Baffle Man

While world opinion is disturbed and distorted by threats of war and general unrest, while thoughts of budgetary deficits and problems of trade engage anxious minds at home, it is inspiring to turn to conquests of the physical universe which, from time to time, demonstrate man's ability to master infinitely greater problems than those which threaten his peace, security and prosperity. The statement may be trite and commonplace, but it is nonetheless true, that man's ingenuity in solving the riddles of the universe is in marked contrast with his apparent stupidity and futility in seeking solutions of others directly within his own purview and which, as a matter of fact, are his own creation.

The thought is suggested by recent addition to scientific knowledge of the atmosphere which is now known to consist of four layers—the troposphere, the stratosphere, the ozonosphere and the ionosphere. The troposphere, the layer closest to earth's surface, is the stratum of changing temperatures and pressures and of wind-driven clouds. As long ago as 1859, it was discovered, by temperature tests, that this layer terminated relatively abruptly at a height of between six and seven miles. Beyond this height, the temperature was found to be relatively constant up to about 23 miles. This layer of calm, cloudless air of uniform temperature is the stratosphere of comparatively recent conquest by balloon ascension.

As this is written, a prairie dust storm occludes the sun, and, as a result, there is a marked fall in temperature. It is palpably cooler. It happens that calculations concerning dust shot into the stratosphere by volcanoes prove similar cooling effects. If one seven-hundredth of a cubic mile of fine dust were blown into the stratosphere it could form a screen which would reduce the intensity of the sun's rays by 20 per cent. The screen would remain suspended in that still windless zone for years, and it has been suggested that the ice ages have been caused by such volcanic dust-storms.

Recent research has shown that, above 23 miles and extending up to 35 miles, is another layer rich in ozone and, for that reason, called the ozonosphere. The significance of this layer so far as human history is concerned, lies in the fact that, because it is absorptive of ultra-violet rays from the sun, the earth is adapted to human habitation. Without this screen, it is said, organic life on earth would be wiped out by sun-stroke.

The ozonosphere, unlike the stratosphere, is not cold but hot. Above it and beginning at 50 miles, lies another layer, the ionosphere, so-called because the gasses of the air in that region are in an electrically excited or ionized state. The secrets of this stratum are yielding to radio research although its existence had been deduced, long before the advent of the radio, to explain some of the earth's magnetic phenomena. The ionized particles have the property of reflecting radio waves back to earth and it has been revealed there are two main layers in the ionosphere, at 64 and 112 miles respectively, which reflect these waves. Each of these is split into two during the daytime making a total of four layers. These four layers probably mark the heights at which particular constituents of the atmosphere become electrified or ionized.

Recent research has further demonstrated that the electrification in the layers is more intense in summer than in winter, the condition being normally due to ultra-violet rays from the sun. Thunderstorms also play their part, it having been calculated that the electrical energy continually released in thunderstorms is more than sufficient to produce all the observed ionization in the ionosphere.

That scientific minds applied to investigation of the seemingly inaccessible have produced so much positive achievement is in striking contrast with the meagre fruits of the efforts of politicians, statesmen, economists and "brain trusts" to solve the problems of man's social and economic relationships. It suggests the thought that the electrical energy continually released in thunderstorms is more than sufficient to produce all the observed ionization in the ionosphere.

## Charting Coast Of Labrador

British Naval Surveying Ship Challenger Engaged In Work

The British naval surveying ship Challenger, has sailed from Portsmouth to resume her task of charting the coast of Labrador. This work has never been completed. Last year the admiralty started the Challenger upon the work because it has become necessary to provide safe channels for navigation along this dangerous coast owing to the development of Labrador. The survey will take years to complete.

New tax rates in Belfast, Ireland, King Prapadipok of Siam has a country estate at Towanda, Pa.

King George V. hasn't read in bed since he was a boy.

## FINE QUALITY TEA ALWAYS ECONOMICAL

Packers of the finest teas such as "Saluda" have been forced to increase prices. As soon as merchants' stocks at present low prices are depleted your favourite beverage will cost you slightly more. This has been brought about by advances at the gardens where production has been purposely restricted in order to save the growers from further disastrous loss. But this comforting beverage is still the cheapest drink in the world next to water itself.

As a matter of fact, your neighbors think just as disagreeable things about you as you do about them.

Canadian macaroni and vermicelli last year made an entrance into Holland for the first time.

## Weary Days—Sleepless Nights Wreck the Nervous System

Men and women too tight after night on sleepless beds. Their eyes do not close in the refreshing repose that comes to those whose nerves are right. They are irritable and nervous, weak and worn out, and everything looks dark and gloomy.

Milburn's H. & N. Pills is the remedy that is required to restore them the blessing of good health. They bring back the sound refreshing sleep, tone up the nerves, and impart that sense of buoyancy to the spirits that is the result of renewed mental and physical vigor.

## Russian Aviators Have Completed Big Task

Rescued 101 People From Floating Ice Off Siberian Coast.

Two months ago 101 Russians were wrecked on floating ice between Wrangel Island and the coast of Siberia. Since that time the efforts of Russian aviators in rescuing the 101 a few at a time has held the interest and admiration of the world. The task was recently completed. Not a life was lost.

Moscow, aware of the rich mineral resources of this Arctic island whose inaccessibility has become proverbial, rashly determined to populate it with permanent colonists. Of the 101 there were ten women and two children. After their ship had been crushed, the adventurers, who had plenty of food and fuel, built living quarters on the ice and were not uncomfortable in spite of the sub-zero temperatures. They suffered little, but they were constantly in peril, for the breaking up of the ice might bring death at any moment.

The organization of the relief work was thorough and systematic, and its success is a tribute both to the skill and to the indomitable courage of the Russian aviators. It is not without reason that Moscow is celebrating, and praising the efficiency of Soviet organization, the hardihood of the marooned men and women, and the devotion and ability of the rescuers. One Moscow newspaper comments, perhaps with reason, that if the disaster had occurred in the days of the czars the Wrangel colonists would all have perished while bureaucratic officials argued as to which department should undertake the rescue.—Cleveland Plain Dealer.

## CAST OFF UGLY FAT

## Woman Loses 28 lbs. in 3 Months

"Three months ago," a woman writes, "I was persuaded to try Kruschen Salts to reduce my weight, which was about 150 lbs. I lost 28 lbs. in three months. I feel five years younger. I really must say I feel a different woman. I have now lost 28 lbs. to date."—(Mrs.) S. C. B.

If you are overweight take one half-teaspoonful of Kruschen Salts in a glass of hot water before breakfast every morning. There will be no rapid or alarming loss of weight, but just a steady decrease of that flabby fat which is as unhealthy as it is unsightly. Kruschen is a scientific blend of six mineral salts found in the waters of those European spas that have been used by generations of over stout people to reduce weight.

## Light Clothes For Warmth

## Several Layers Better Than Small Number Of Heavy Ones

Very thick, heavy garments are not so helpful in enabling one to keep warm, as might be supposed. A far better way to try the cold is to wear a larger number of light ones. The late Lord Kelvin was a great believer in this method. On one occasion when he was making tests of his sounding machine on a battleship on a bitterly cold day, he was asked why he did not wear an ulster. His reply was that he did not need one. The colder the weather, the more thin underclothes he put on, and the air between them insulated his body from the freezing winds. Many fishermen have also found that several layers of light garments are more useful than a small number of heavier ones, and act accordingly when facing the intense cold frequently encountered on their winter fishing trips.

## Seems Hard To Solve

Perhaps there ought to be a happy medium between the methods of young scientific students of babies and the methods of their grandmothers. A Baltimore specialist condemns the modern method which leaves babies too much alone. It is curious that after several hundred thousand years' experience the human race has not come to definite conclusions as to how babies should be brought up.

## Deep Sea Exploration

Diver Will Spend Six Months Studying Fish In Ocean's Depths

Even though he plans to drop 3,000 feet down into the depths of the ocean in a diving globe, William Beebe doesn't expect any sea serpents.

"I saw one once," he said, a grin wrinkling his weathered face. "Then I took a second look. At first glance, it was a tremendous sea serpent writhing away into the horizon. It turned out to be the Atlantic cable." Mr. Beebe was making last preparations for his departure for St. George, Bermuda, where he will spend six months studying deep sea fish and the strange, weird lives they lead.

Rafferty: "The new boss of the factory'll be an old-fashioned man, I'm thinkin'."

O'Hara: "He's so old-fashioned he will be takin' the belts from the drive wheels and replacin' them with suspenders."

Husband: "Why did that woman keep you standing at the door for half an hour?"

Wife: "She said she hadn't time to come in."

## Got Post War Job

Showed One-Armed Man Who Did Great Things For England

The story how Sir Edward Hilton Young, minister of health, who lost an arm in the 1918 raid on Zebrugge, got a post-war job with the admiralty was told in a speech by Lord Riddell. Sir Edward, Lord Riddell said, came back from active service and sought a position with the admiralty only to be told there was "no room for a one-armed man."

Sir Edward, he said, retorted: "Well, come with me to Trafalgar Square and I'll show you a one-armed man who did great things for England."

That, concluded Lord Riddell, was too much, "even for the admiralty," and one of his chiefs replied: "If you are another Nelson we will take you on."

## Favor Smaller Bank Notes

The Montreal Board of Trade is in favor of smaller banknotes and announced that a communication has been sent to the Hon. E. N. Rhodes, minister of finance, Ottawa, suggesting the change. The board believes the opening of the Bank of Canada would be an appropriate time to alter the dimensions of the bills.

## Almost Instant Relief From Neuralgia

1. I'LL HAVE TO GET A TAXI AND GO HOME. I'VE DEVELOPED A TERRIBLE ATTACK OF NEURALGIA

MARY: WHY DON'T YOU TRY 2 ASPIRIN TABLETS. THEY'LL GET RID OF YOUR NEURALGIA IN A FEW MINUTES

2. 20 MINUTES LATER — IT'S WONDERFUL HOW QUICKLY MY NEURALGIA WENT. THAT ASPIRIN CERTAINLY WORKS FAST

YES, ISN'T IT WONDERFUL

## For Quick Relief Say ASPIRIN When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. Hence to start "faking hold" of pain a few minutes after taking. The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And thus is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

## WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet in a glass of water. Note that BEFORE it touches bottom, it has started to disintegrate. What it does in this glass it does in your stomach. Hence its fast action.

MADE IN CANADA

Does Not Harm the Heart

## Federal Minister Of Agriculture Gives Some Interesting Facts About Crested Wheat Grass

In the course of an answer to a request in the House of Commons for information regarding crested wheat grass, Hon. Robert Weir, minister of agriculture, gave many interesting and valuable facts. I think it is a safe statement to make, he said, that the hope for crested wheat grass and what it will accomplish is even greater than I stated to the committee a year ago, and I recall that in that statement I was quite enthusiastic. As the hon. member has indicated, especially in districts where there is a great lack of moisture, crested wheat grass is particularly suitable. Even in our Manitoba station, where there is a considerable area that has been abandoned by farmers on account of lack of moisture, experiments have been made with crested wheat grass, brome, sweet clover, western ryegrass, and some other grasses, comparing them as to the growth and make with a limited amount of moisture. In those experiments, crested wheat grass showed itself much superior to the other grasses. One noticeable thing about these plots was that in the crested wheat grass plot there were practically no weeds; its tendency to absorb the moisture was so great that there was not sufficient moisture left for the weeds to make headway. Another advantage of this grass is that it is a cool weather grass as well as a dry season grass; when the snow goes off in the spring this grass is as green as it is perhaps at any time of the year.

Also crested wheat grass is a palatable grass, and it has a high yield of seed. In the fall when the cool weather comes on, it seems to take on new life, because it is particularly adaptable to cool weather and remains green and maintains a fine growth until covered by snow. Another important characteristic it has, especially important in very dry areas, is that when even western ryegrass will not winter-kill, the crested wheat grass seems to become dormant, but responds to the very slightest degree of moisture.

One of the hardest tests that crested wheat grass has experienced was in a seeding that took place on the lawn of Professor Harrington in Saskatoon. He had a cement sidewalk running through the lawn, both sides of which were seeded with crested wheat grass, particularly on the fairway strains. One of our most likely strains for fairways on golf courses and for laying down lawns in Western Canada. It is a strain that is rich in foliage and spreads more than some of the other strains of crested wheat grass; the seed was watered and protected; on the other side the children of Professor Harrington and his neighbours played, and it became almost like a pavement. Then towards the middle of August it also was watered and protected. It responded very quickly, and before winter set in showed an excellent growth.

It has always been realized by those interested in diversified farming, particularly in the west, that the need was for a domestic grass. We believe that, in almost every respect, crested wheat grass will meet that need, not only in the dry areas, but it also stands up well in the northern areas. At the Indian Head station some years ago, two pounds, I believe, were seeded very sparsely, and there were threshed from this patch, 1,520 pounds of seed. That also is another very important characteristic of this grass, its high yield. Another important feature is that one can allow the seed of crested wheat grass to mature and then cut and thresh it, and the stalks of the grass will remain green and palatable, unlike western ryegrass and other grasses of that nature, which, if allowed to ripen in the least, become woody and dusty and not palatable.

Nearly 200,000 books were produced in England in the last 12 months.

W. N. U. 2045

### Livestock In Demand

#### Higher Prices Now Being Paid For Breeding Stock

The demand by farmers for livestock for use and breeding purposes is increasing. The average price paid for horses at the Regina Winter Fair, including a number of broodmares, was \$75 per head. One team sold for \$330 and another for \$326. This is regarded as an indication of the return of the horse to popular favour.

The average price realized for Shorthorn bulls was \$114, compared with \$87 a year ago. Hereford bulls averaged \$104, slightly up from the previous year, and the average for Aberdeen Angus bulls rose from \$88.50 a year ago to \$122.50. The best price for a single animal was \$240, and several sold for over \$200 each.

Every breed now offered sold at a good price. Thirty-six brought an average of \$37.75; the top price for an individual was \$94 and the second highest price \$60. The good figures paid for bred sows reflected the prices now being obtained for select bacon hogs.

Saskatchewan is the largest wheat-producing province in Canada and one of the chief wheat-growing areas of the world, and the trend to horse power and stock raising is regarded as significant.

### Was Noted Inventor

Dr. Thaddeus Cahill Gave Up Law To Follow Hobby

Dr. Thaddeus Cahill, 76, who deserted the legal profession at the age of 26 to become an internationally known inventor, died in New York recently of heart disease.

Turning to electrical and scientific study at an early age, he invented an electrical typewriter and a device for producing music electrically, known as the telharmonium, which attracted the attention of governments abroad.

He constructed a piano in West 66th street, where musicians played on electrified keyboards and their music, carried by wires, was heard in Carnegie Hall and other places in New York as well as in Boston, Springfield, Baltimore and Washington. He was a native of Iowa.

### Not Much Called For

An artist who was spending a holiday in a small village entered the store and asked if they stocked camel hair brushes.

"No, sir, we don't," the shopkeeper replied. "Yes, sir," he added, apologetically, "we never have no call for 'em. Nobody in these parts seems to keep camels!"

By Ruth Rogers

## All Dressed Poultry Imported Into United Kingdom Will Carry Mark of Country of Origin

### Survival Of Civilization

Time Is On Its Side If Peace Be Granted

In a speech in London recently Mr. Hawtrey, the present assistant secretary of the treasury, again declared that in his opinion "the characteristic of the present depression is, above all, a shortage of consuming power, due to the shortage of money." And within an hour or two of Mr. Hawtrey's declaration, no less futuristic a politician than Mr. Churchill, in an unmeasured broadcast, was permitted to announce that without a revolution, and with a little commonsense, the spread of the plenty which science had bestowed upon us could be easily brought about. While the welcome grass is growing, however, the steed is starving; and, most unfortunately, the time is all too short for its slow however sure maturing. Given the security of a few more years of peace, we should be content in the confidence of the triumph of social credit over all its present critics and enemies. Time is on its side if peace be granted. But as the clouds are indubitably gathering for war on a scale hitherto only dreamed of in nightmare, it appears to be all too probable that, as Professor Murray has said, civilization may die not only with the cure at its hands but in the presence of doctors who lack only one thing to save their patient—the will—London New English Weekly.

### Shortage Of Flax

Western Lined Oil Mills May Have To Import From Argentina

Unless production of flax in Western Canada now almost entirely suspended, is resumed soon, three western lined oil mills, one of them at Medicine Hat, may have to turn to importing from the Argentine, it was learned. Canada's entire production of the seed last year was insufficient to meet the demand of the mills.

Failure to supply the 240,000 bushels consumed by the Alberta mills means a loss of \$500,000 a year to Alberta farmers, according to W. A. Church, the Medicine Hat mill manager. At one time Alberta produced more than 1,000,000 bushels of flax a year but last year the figure fell to 50,000 bushels from 10,000 acres. The field crops branch of the Alberta department of agriculture has endorsed the suggestion that acreage now needed to wheat should be sown with flax.

Parents of 10 children in Italy are now exempted from taxation, while bachelors between the ages of 25 and 60 are heavily taxed.

World trade has fallen so low that more than one out of every five ships of the world's tonnage is laid up.

Under an amendment to the British government Merchandise Marks Act, which will come into effect on and after June 22, next, all dressed poultry imported into the United Kingdom will have to carry an indication, in a conspicuous manner of the country of origin.

Canada has an important export trade to Britain which just now is particularly active. It is believed the new regulation is not likely to be a handicap to that trade.

The act lays down "that each bird must be marked legibly and durably on a seal or disc of a permanent character and not less than two centimetres in diameter, securely attached to one of the wings of each bird by a durable attachment passing through a circular hole not less than one centimetre in diameter punched or stamped through the web of the wing; and in each case the indication of origin shall be printed, stamped or embossed on such seal or disc in letters not less than one and a half millimetres in height."

This order is going to affect Canada as the Dominion exports substantial quantities of poultry to Britain, particularly during the Christmas season.

"Some may consider this order a rather serious handicap to the export of frozen poultry which has not previously been marked," state officials of the livestock branch of the Dominion department of agriculture.

Of the 10,000,000 pounds of poultry ordinarily stored in Canada it is by no means possible to indicate in advance what proportion is going to be required for export. The marking required for the British market would have no special significance for Canadian trade unless each bird were similarly tagged with the grade name. Most of the Canadian poultry going forward is so marked and it will be comparatively simple to coincide Canadian with British requirements in this respect. In view, however, of the extreme difficulty, if not almost impossibility, of marking frozen poultry as required by the British order after it has been frozen, Canada is particularly fortunate inasmuch as she has already available on the London docks a defrosting plant which will permit of the marking being done after the birds have been defrosted."

### Control Of Emotions

Psychologist Believes It Is Necessary To Suppress Freedom Of Emotions

The belief that children's emotions should not be suppressed was branded as "absurd" by C. R. Myers, consultant psychologist of the Ontario department of health, in addressing the Social Service Council of Canada at London, Ont.

Mr. Myers enlarged upon the possibilities of what might happen if children were allowed freedom of emotion. "If we didn't suppress emotions all the time," he explained, "civilization would be impossible. Think what would happen if we went in and had a fight every time we became angry or ran away every time we felt fear."

Children had no natural fears, he explained, and these were entirely developed by a person as he grew older. There was no fear of death in the minds of children.

What he described as "emotional health" was more important than intelligence, he said.

### To Whom It Concerned

Mrs. Brown had occasion to reprimand her colored cook rather sharply. The victim looked daggers but said nothing until she reached the kitchen, when her voice could be heard in shrill vituperation. So loud became the clamor and so vindictive the exclamations that her mistress hurried downstairs.

"Why Lisa," she began in amazement, "who on earth are you talking to?"

"Ah ain't talkin' to nobody," was the reply, "but ah don't keer who in dis house heah's me."

### PICTURESQUE SCENE GREET'S PRINCE GEORGE IN BECHUANALAND

When Prince George was in the Bechuanaland Protectorate during his tour of South America, he paid a visit to Gaberones to attend the native celebrations and sports held in his honour. This remarkable photograph, taken under the burning African sun, shows a group of Wayfarers Native Girl Guides performing the "FOT DANCE" before His Royal Highness.

WORLD HAPPENINGS  
BRIEFLY TOLD

Leon Trotsky may become a permanent "unwelcome guest" of France, it has been revealed, because no other country will take him.

Negotiations are proceeding satisfactorily for construction of a new 7,000-ton cruiser for the royal Australian navy.

Without discussion the House of Commons voted \$2,250 for Jack Miner, famous Kingsville, Ont., naturalist, to enable him to carry on his bird sanctuary.

The season's trans-Atlantic, passenger service opened at the port of Quebec, April 30, with the arrival of two liners, the Duchess of Atholl and the Montcalm.

A suggestion that 40,000,000 women of all classes, creeds and races share in the 1934 Nobel peace prize has come to the Nobel committee from Viscount Robert Cecil of Chelwood.

Imports duties collected at the port of Ottawa during the month of April amounted to \$301,687, an increase of \$205 as compared with the corresponding month of last year, it was announced.

Inauguration of a regular air mail service between Fort Chippewyan, Alta., and Fond du Lac, Sask., on or about June 12 was announced by the post office department. It will be the first direct service ever operated between the two northern posts.

Subject to approval of the Canadian government, which he said he would approach when his plans are matured and sufficient capital for endowment has been secured, Abbot Chao Kung, former Treibacher Lincoin, will establish a Buddhist monastery in British Columbia.

The world wheat crop over the summer harvesting area was predicted as being about equal to that of 1932. The International Institute of Agriculture, in making this prediction, said that present available figures indicate losses in certain producing countries will be balanced by gains in others.

## Stamp Collectors Interested

Thousands of Letters Received For Delivery Over New Air Service In North

Nearly 70,000 stamp collectors from all parts of the world have sent letter covers to be flown in the first flight of the new air service from Prince Albert and Beauval and late a la Croix.

It means at least \$1,500 revenue on the first flight for the post office. Covers to stamp collectors in New Zealand, Germany, France, England, the South American countries, the United States and every Canadian province have arrived, and await the coveted cancellation stamps and the "tear-off" or special marking stamped on each first flight cover.

Extra revenue accrues when collectors put more than the required number of postage stamps on each cover or when the covers are intended to guarantee safe delivery.

## Lord Baden-Powell

Lord Baden-Powell, founder of the Boy Scout movement, whose life was almost disrupted of early this year, was able to walk with the aid of two sticks, when he returned from a Mediterranean cruise. Lord Baden-Powell, who underwent internal operations Jan. 4 and 20, is 77 years old.

The earth travels around the sun at an average speed of 18,022 miles a second or nearly 70,000 miles an hour.

THAT DEPRESSED FEELING  
IS LARGELY LIVER

Wake up your Liver Bile

—Without Calomel

You are "feeling punk" simply because your liver isn't putting its full quota of liquid bile into your bowels. Digestion and elimination are both hampered—your complexion is being poisoned.

What you need is a liver stimulant. Something that goes farther than salts, mineral water, oil, laxative candy or chewing gum or tablets which only move the bowels—ignoring the real cause of trouble, your liver.

Take Carter's Little Liver Pills. Purely vegetable. No harsh chemicals.

Ask for them by name. Refuse substitutes. See all druggists.

By Ruth Rogers

LITTLE DAUGHTER FOLLOWS "SUIT" BECAUSE MUMMY HAS DECIDED IT'S A SUIT SEASON

Here she is showing just how attractive and practical her new model can be. Originally it was carried out in a pretty medium blue and white cotton print. The boxy jacket was plain darker blue linen-finished cotton. Red and white striped candy stripe seersucker with plain red linen jacket is another cute scheme.

For very smart wear, printed tub silks makes up very attractively with self material jacket of plain crepe to tone with the print.

Style No. 675 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 2 1/2 yards of 39-inch material with 1 yard of 3/4-inch ribbon for bow; separate jacket requires 1 1/2 yards of 39-inch material. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Little Journeys In Science

FIRE AND FLAME

(By Gordon H. Gurst, M.A.)

No one knows when man first kindled fire, but we do know that there was a time when he was not able to do so. The eruption of volcanoes, lightning, and forest fires were his first experiences with the phenomenon, and from these he learned a fear and awe of it, and later he worshipped it. It is not known how primitive man first learned to kindle a fire, but it is thought he did so by friction, a method which is still used in many parts of the world, and which applies to our modern friction match, invented in England a century ago by John Walker.

Fire first served man with its warmth and by helping him to repel the attacks of wild beasts. He used it also as a beacon to guide him through the dark forests, and in it he forged his first primitive weapons. Lavoisier, the great French scientist who lived in the eighteenth century, first discovered the real nature of fire and flame, and proclaimed it as the rapid combination of fuels with oxygen, accompanied by the production of heat and light.

From the days that man first learned to make fire until comparatively recent times, the first of home and industry were fed only with wood. Then a new fuel was discovered, which marked the beginning of the age of steel. This new fuel was coal.

The change from wood to coal brought about a great change in industry. The importance of coal in the smelting of iron made it the foundation upon which our modern machine age has been built. All the early steam locomotives were fired with wood. The adoption of coal for fuel gave them far greater speed.

Oil has been known to man for several thousand years and was used to some extent in all ages. Heavy oil was first used as a fuel in the oil fields of Russia many years ago and it is there that the first oil-burning stoves were invented. Today oil, instead of coal, is the fuel that drives the mightiest battleships and the swiftest ocean liners.

## Timber For China

Five carloads of white poplar logs cut by M. M. Connelly of Fraser Lake to fill an order from China for matchwood timber have been shipped from Prince Rupert to the Orient. Twenty more cars of the timber is expected to arrive. The logs run in the vicinity of twenty feet in length with a minimum diameter of ten inches.

## SUNDAY SCHOOL LESSON

MAY 13

CHRISTIANITY AND PATRIOTISM

Golden Text: "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the great and first commandment. And a second like unto it is this, Thou shalt love thy neighbor as thyself." Matthew 22:37-39.

Lesson: Matthew 22:1-23:39. Devotional Reading: Romans 13:8-14.

## Explanations And Comments

An Adroit Question and Its Purpose, 22:15-17. The Pharisees were now resolved to bring about the death of Jesus. They had no power to order his death; they must secure from the Roman Governor his death sentence. How was this to be done? They decided to attempt to ensnare him in his talk, hoping to force him to say something which they could report to Pilate, the Governor, as treason. And, indeed, two days later they falsely told Pilate, "We found this man perverting our nation, and forbidding to give tribute to Caesar." Luke 23:2.

Then came the question about which, for a moment, the Pharisees were all things to learn the truth. "Tell us, therefore, What thinkest thou? Is it lawful to give tribute unto Caesar, or not?"

A Wise Answer and Its Result, 22:18-22. Jesus understood that back of their compliment and their posing as admirers of fearless straightforwardness was a plot to bring about his death, and he said, "Why make ye trial of me, ye hypocrites?" "Show me the tribute money," he ordered.

"Whose is this image and superscription?" Jesus next asked. "Render unto Caesar the things that are Caesar's," said Jesus, and then added quickly, "And unto God the things that are God's."

The effect of Jesus' answer was to convict both parties of unreason, to awaken every sincere element in the hearts of both, to place the issue at stake on a high plane, to disallow as irrelevant most of the pleas and counterpleas of the long controversy between them." (H. Hensley Henson).

## Amend Food And Drugs Act

Restrict Sales Of Proprietary Medicines To Be Used For Common Ailments

Sales of medicines advertised to cure cancer, tuberculosis, diabetes and such diseases will be prohibited under an amendment to the Food and Drugs Act to be introduced in the House of Commons. The amendment will restrict the sale of medicines under the act to common ailments.

The use of acetic acid as a substitute for vinegar or the sale of substitute vinegar will not be allowed under a further amendment to the act.

The Proprietary or Patent Medicines Act also will be amended. The amendment will make it compulsory to place a cautionary label on patent medicines containing potent drugs.

Eighty-six men more than 80 years of age were married in the Old Court in 1932, according to official statistics.

## Was Good Sprinter

English Girl Runs Across Westminster Bridge In Record Time

Florence Elliott, 19-year-old amateur sprinter and member of the House of Commons catering staff, undertook to run across Westminster bridge before Big Ben had finished striking 12. She made it.

Wearing shorts and singlet, she started at the first strike of noon, ran through the sidewalk traffic and reached the far side before the 10th strike of the hour. The distance is 252 yards and Big Ben takes 45 seconds to strike 12.

If a man has a sense of humor he knows when not to get funny.

## SOME CHANGES MADE IN GOLD TAX APPLICATION

Ottawa.—The government brought relief to non-dividend paying gold miners, placer miners and producers of low grade ore, by amending that the proposed tax on gold would not apply to them. The question of constitutionality of the tax, if any existed, was dealt with by changing the procedure to place a 25 per cent. tax on the premium paid instead of 10 per cent. tax on production.

As a further guarantee against anything in the nature of double taxation the gold mine companies will be permitted to credit their corporation income tax against the gold tax.

The tax, which will run from April 1 of this year to May 31, 1935, will not apply to any company not now paying dividends, nor to any company which did not pay dividends prior to January 1, 1933.

In no case will the tax operate when the premium is such that the price to the producer is less than \$30 an ounce. This was the same provision placed in the original proposal.

Announcement of the change was made by Prime Minister R. B. Bennett. He referred to the protests that had been raised against the tax, particularly in Ontario, and to the charges that the tax was unconstitutional.

There was no question in his mind as to the power of the government to impose the tax, Mr. Bennett said, and he referred to section 91 of the British North America Act. He described also the long discussions between the government and representatives of the mines.

He believed the plan now proposed would meet with general approval of those most concerned. The conferring mining interests had accepted it as a fair way of dealing with the situation.

It is anticipated the tax will bring in a revenue of about \$500,000, which will make up the loss in revenue from reduction of the tax on sugar for which the original imposition on gold was designed.

The only official protests against the tax from a provincial government, came from Ontario, the prime minister said. Hon. Charles McCrea, Ontario minister of mines, had spent some time in conferences with the prime minister and the minister of finance, and had arranged meetings between the government and the miners. Other provinces had complained "to the populace" through the press, the prime minister said.

## Control Meat Production

British Parliamentary Agricultural Committee Submits Plan

London.—A move to control meat production along the lines already suggested for wheat growers was made by the parliamentary agricultural committee here. The main points of their program will be submitted to the government for its approval.

The principal points are:

1. To guarantee the farmer a minimum price.
2. To raise the guarantee funds from an import duty on foreign meat.
3. A measure to raise prices and develop internal production while limiting importation.

### Pneumonia Protection

Stockholm, Sweden.—Professor Van Euler, who won the Nobel prize for chemistry in 1929, has discovered a substance capable of protecting man against pneumonia, the Svenska Dagbladet reported. Professor Euler found the substance in the juice of lemons, currants, and certain other fruits.

### Tornado Kills Twenty

Calcutta, India.—Twenty persons were killed, hundreds injured and a dozen were reported missing after a tornado swept the town of Sylhet in the province of Assam. Native houses were blown away and many small craft on the Surma river foundered.

W. N. U. 2045

## Flood Causes Heavy Damage

People Of Fort Vermillion Forced To Vacate Homes

Fort Vermillion, Alta.—The entire population of Fort Vermillion was forced to flee to the hills to escape flood waters from the Peace river, caused by ice jams just above the town. Five homes were completely wrecked, buildings inundated, telegraph towers crashed by ice and thousands of dollars damage done to property and livestock as a great wall of water swept over the town at 4 a.m. Fort Vermillion is about 250 miles north of Peace River town on the Peace river.

The entire population spent the night camped in the hills watching the devastation of their homes going on below them.

On the south bank of the river, men of the settlement hastened to rescue children from the mission with teams and wagons, but within a few minutes the teams had to be abandoned and boats were used as the swirling water flooded the ground floor.

Battering ice cakes crashed into telegraph towers on the north side until they gave way before the impact and were swept away in the tide.

Fort Vermillion settlement has a population of about 200 persons. The population of the district is about 1,500.

## Canadian Wheat For Japan

Dominion Sold Japan Wheat To Value Of Three Million Dollars Last Year

Montreal.—Although Japan buys most of her wheat from Australia due to the latter country's lower rate of exchange Canada nevertheless sold Japan \$3,000,000 worth of wheat last year, Hon. Herbert Marler, Canadian minister to Japan, stated here.

He thought it would be many years before Manchuria loomed as a serious competitor in the world's wheat markets. Last year, he pointed out, Manchuria produced about 60,000,000 bushels of wheat, sufficient only for the Harbin area.

## B.C. Liquor Revenues

Increase Is Shown For Months Of January and February

Victoria.—British Columbia liquor revenues showed an unexpected gain of 25 per cent. in both January and February, and 40 per cent. in March over the corresponding figures of last year, figures available revealed.

Liquor estimates for the fiscal year commencing April 1, 1934, had been placed at \$300,000 less than in the same period last year, but current indications are that they will be up instead of down.

Increased purchasing power within the province is believed responsible.

### Ontario Fall Wheat Damaged

Toronto.—In practically all sections of Ontario fall wheat has been damaged extensively by a severe winter, frosts and frosts and in some cases 90 per cent of the crops have been killed, the provincial department of agriculture reported.

### Coming To Canada

Sydney, N.S.W.—Stanley M. Bruce, Australian high commissioner in London, started May 3rd on a journey which is taking him to Ottawa and Washington to discuss world wheat production and other matters with President Roosevelt.

### Stamps Bring Big Price

London.—At the auction sale of the Hinds stamp collection, two Canada 12s. stamps, black, 1851 issue, were sold for £1,400. Eight years ago at the sale in Paris of the Perrin collection, these two stamps were bought for £925.

### Death Of Evangelist

Toronto.—Rev. Dr. H. T. Crossley, former member of the international known evangelistic team of Crosley and Hunter, died here recently at the age of 83.

### Prisoners For Soldiers

Nanking.—Gen. Chiang Kai-Shek, war lord of China, ordered that all prisoners—numbering tens of thousands—in Chinese prisons be treated as soldiers.

## BREAKS SILENCE

Alexander Keresensky, former Premier of Soviet Russia, who recently broke the silence of years to declare Communism a dead issue as practiced in Russia. One of his major reasons for such a contention was that in the struggle between capitalism and labor, the middle class has emerged more powerful than either.

## Beat Mollison Record

Aviators Make Australia-England Flight In Less Time

Lympne, England.—Kenneth Waller and Bernard Rubin set a new record for the flight from Australia to England, looping two and one-half hours off the previous mark established by James Mollison.

Waller, pilot instructor of the Cinqueports Flying Club, and Rubin, an Australian flyer, left Port Darwin, Australia, April 28 and landed here after eight and one-half days flying.

They had flown to Australia from here, leaving March 22, with the object of surveying the route of the England-Australia air race that will be held late in the summer in connection with the centenary celebration of the state of Victoria.

They landed at Port Darwin, April 8, after being two weeks en route.

### Bill Ready For Discussion

Ottawa.—The government's program of public works for unemployment relief may be introduced into the house before long. In answer to a question by Rt. Hon. Mackenzie King, opposition leader, the prime minister said that the legislation was practically ready, but he thought it advisable to advance bills now before the chamber before introducing new material.

### Currie Scholarships

London, Ont.—Establishment of two scholarships at the University of Western Ontario in memory of the late Sir Arthur Currie, commander-in-chief of the Canadian corps in France, and principal of McGill University, was authorized by the board of governors of the Ontario institution.

## AS NOME HONORED SOVIET FLYER

Commander Maurits Silpov, Soviet aviator, received flags of the Soviet Republic and the United States from the Chamber of Commerce, Nome, Alaska, before he boarded his plane for a flight to the ice pack where 101 survivors of the ill-fated freighter Cheilyuskin were awaiting rescue. Silpov received highest Soviet honors for his gallant work in rescuing the castaways.

## Imperial Press Conference

Eight Canadian Delegates To Go To South Africa

Toronto.—Canada will be invited to send eight delegates to the fifth imperial press conference, it was announced at the annual meeting of the Canadian section, Empire Press Union, here. The conference will be held in the Union of South Africa from May 6 to June 21, 1935.

Details of the trip were explained at a meeting, held under the chairmanship of J. H. Woods, editor of The Calgary Herald. There will be a tour of South Africa and Rhodesia, the delegates to be the guests of the South African section. Preliminary arrangements for selection of delegates were left in the hands of the executive.

Reports presented at the meeting showed the Canadian section to be in flourishing condition with membership well maintained. The news letter issued monthly and mailed to all members of the Empire Press Union throughout the British Empire, continues to be well received and is doing good service in making Canadian affairs better known in other Empire countries.

Words of appreciation were voiced also of the Australian news letter, which is doing a similar service for Australia in Canada and elsewhere.

## Farm Credits

Premier Brownlee Of Alberta Confers With Dominion Officials

Ottawa.—Hon. J. E. Brownlee, premier of Alberta, and Hon. George Hoadley, his minister of agriculture, were in consultation with Dominion government ministers and officials, particularly in respect to the forthcoming legislation dealing with refinancing of farm credits and amendments to the bankruptcy acts.

Pressure of other business has delayed appearance of this legislation, announcement of which was made some weeks ago. It is a measure of far-reaching ramifications, involving as it does the bankruptcy and moratoria legislation of the provinces.

Mr. Brownlee will be in Ottawa for some time.

## Relief For Veterans

Seven Thousand Dollars Voted For Aid For Saskatchewan Commandants

Ottawa.—Seven thousand dollars for immediate relief among veterans of Saskatchewan was voted at a meeting of past Dominion presidents and presidents of provincial commands of the Army and Navy Veterans in Canada, meeting here.

The money will be made available at once, and distribution to applicants will commence on the arrival at Saskatoon, next week, of Col. H. W. Arnold, president of the Saskatchewan provincial command.

It was Col. Arnold who presented the claims of distressed veterans of Saskatchewan and the urgency of immediate assistance at this time.

## CONTROL BOARD FOR BAKERIES IS SUGGESTED

Ottawa.—Creation of a Dominion licensing board with powers designed to meet the problem of chain or mill-controlled bakeries and bread sales by chain and department stores was proposed to the Stevens price spreads and mass buying parliamentary probe by Mark Bredin, president of Bredin Bread Co., Toronto.

Submission of baking codes proposed by the industry in British Columbia and Saint John, N.B., was made earlier in the day. Mill controlled baking establishments were attacked by James Dempster, Toronto baker. Charges that ruthless competition by chain and department stores had seriously disrupted the bread business in British Columbia were made by R. W. Ward, Vancouver, vice-president, Canadian Bakeries, Ltd.

The board which Mr. Bredin advocated would have to be clothed with the following powers:

1. To require all bakers, jobbers and independent distributors of bread to operate under a license.
2. Issue and continuance of such license to be conditional upon compliance with regulations from time to time promulgated by such licensing body.
3. The setting up of an advisory body representative of the bakers to assist the licensing body in carrying out its functions, such advisory body consisting of representatives of provincial associations of the baking industry.
4. The regulation of the price of bread in co-operation with the board or committee outlined in provision three, such price to have as its basis the cost of raw materials, all production, delivery and other costs including a fair scale of wages with minimum wages and maximum hours as adopted, and to be enforced by the properly constituted authorities.
5. To compel a high standard of cleanliness and sanitation; adherence to provincial standards of weights.
6. The definition and prevention of unfair trade practices.
7. The elimination of the spread between the resale price at chain and other stores and retail wagon price.
8. The proper consideration of the consumer's interest in the performance of all its functions.

The capital set-up of a number of baking establishments would be taken up at a later stage of the inquiry, Hon. H. H. Stevens, committee chairman intimated.

## Lumber Exports Heavy

March Shipments To British Market Valued At \$2,235,000

London.—Canada during March led all countries as an exporter of lumber to the British market.

Board of Trade returns show total British imports of wood and timber in that month as \$8,235,000, of which a quarter, or \$2,225,000 worth, came from Canada.

The March imports from the Dominion were three times as great as in March a year ago, five times as big as in March of 1932, the respective figures being \$665,000 and \$400,000.

## Develop Tourist Traffic

Senate Committee To Study Methods To Encourage Travel

Ottawa.—Two names have been added to the senate committee which will study methods to develop tourist traffic; they are Senator R. B. Horner of Saskatchewan, and Senator C. MacArthur of Prince Edward Island.

At a preliminary meeting it was decided to call J. B. Harkin, commissioner of national parks, as witness at the first meeting. Senator W. H. Dennis of Halifax will preside.

### On the Subject of Sweepstakes.

One subject which has come in for a lot of discussion of late is that with reference to Sweepstakes, owing to the effort which had been made to have these legalised in Canada. The Grand Prairie Tribune has the following very sensible remarks to make on the subject:

Many are opposed to sweepstakes and all the rest of such speculations on the ground that they are gambling.

There seems to be conflicting ideas among Canadians as to the definition of the word.

In the opinion of The Tribune anyone who tries to make money without contributing its equivalent in some form of service to society is gambling. In other words, a man or woman who attempts to get something for nothing is gambling.

The fact that so many Canadians lift up their hands in holy horror against sweepstakes and close their eyes to betting, on wheat, real estate, booms and all the rest of it, demonstrates inconsistency in thinking.

No sweepstakes ever had anything on the real estate boom which was staged in Edmonton a few years ago. Lots were sold in certain sections along the river which would put an experienced hill-climbing goat to the test to climb up.

In other places in the West lots were sold which were finally discovered when the owner arrived to be under water.

All this nefarious practice went on for months—yes, for several years—sanctioned by the laws of the country. Not in all these months did people hold up their hands and protest against the many swindles which were perpetrated.

The reason for this state can be attributed to the fact that all wanted to get something for nothing—to annex a portion of the coin of the realm without giving anything in return. In a word—all were gamblers.

A hue-and-cry goes up when it is learned that some men sit down to a table, and, with their eyes wide open, play for money: yet people remain silent when promoters of newly formed companies vote themselves thousands of dollars on something that does exist, in the hope that a gullible public may be induced to buy shares for which they have to pay real cash. Of course such practice was never considered immoral in the old days. It was all in the game.

As the Tribune sees the question, there is no more wrong committed by allowing sweepstakes to be conducted than in allowing the numerous other forms of gambling, which are not only allowed but are considered highly respectable.

Let us be consistent in our thinking, and call gambling by its right name wherever it appears.

### ADVICE ON COUCH GRASS ERADICATION IS NOW AVAILABLE.

#### Northwest Grain Dealers Finance Scientific Study for Control of This Weed.

Scientific methods for control and eradication of Couch Grass, a weed which is spreading over western Canada, is made in a pamphlet prepared by Dr. McKee, Prof. of Agronomy, and W. Tildesley, BSA, of Agricultural College, University of Manitoba, on behalf of the North West Grain Dealers' Assn.

Line elevator companies operating thru the Prairie Provinces have financed scientific studies of the weed problem which has been under way for the past three years. The results of these investigations have now been published in pamphlet form. The pamphlets are being distributed free at all line country elevators.

Couch Grass was introduced in Western Canada through small lots of seed sent out to farmers in this country from friends in Europe during the latter part of the last century, and before proper inspection facilities were established on seeds imported into Canada. The Chief Analyst of the Dominion Seed Branch at Winnipeg has found that approximately one-half of the Bromus Grass seed sent to the Seed Branch for inspection contains Couch Grass.

The pamphlet dealing with Couch Grass outlines methods for the control and eradication of this weed in a manner that the ordinary layman can easily read and follow. Any farmer troubled with Couch Grass in his fields should obtain a copy. It is also particularly valuable and informative to farmers who wish to keep their fields free from this weed.

## SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, are secretly deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to help Peter, Sylvia Todd, Peter's model, and Gus Matson, her former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla with impersonations. When the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Bowman and Woods, an advertising agency, where Camilla has submitted some of her work, send for her and offer her a salary of \$50.00 a week, to start and a prospect of having it doubled. She tells Peter of her good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained work and is going to leave the Hoyt household. Avis Werth rents a studio on the same floor as Peter, and invites him to have lunch there. He accepts reluctantly, but is favorably impressed with his visit. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000.

(Now Go On With The Story)

## CHAPTER XLII.

"By the way," Peter said suddenly, "we are invited to a party for Saturday night. Avis is having a hot studio-warming, I suppose you would call it, and she commands our presence."

A little frown shadowed Camilla's face for an instant. "I can't understand why Avis took that large studio-warming, I suppose you would call it, and she commands our presence."

"I suppose because she can afford

to do whatever she fancies. Just a whim for the moment."

"No doubt. But, even so, I wonder why she didn't take a place in the Craft building, since money is no obstacle. The apartments are ever so much nicer and more modern."

"She doesn't think so at all. I asked her the same question. She says the older building is ever so much more artistic and has more atmosphere than the new. And you know, her suite looks out on that little garden court with a window alcove from each room. I don't know but she's right, at that. Her furnishings are ever so much more effective in those high ceilinged rooms than they would be in the low rooms of the Craft building, with narrow casements and shining new varnish. She has some gorgeous stuff."

"Oh, you've seen her apartment?"

"Of course," being her nearest neighbor, I had to pass inspection on it before she opened it to the public," he said lightly. "She's going to have me do some things for her when I get time. First, portrait, old girl. So you must be your sweetest to the new client. Remember, the customer is always right, whether she is or not."

"Most of the time she isn't, but I'll do my best for the cause," Camilla smiled gallantly. A little secret fear clutched at her heart—it was premonition or warning?

But she quickly dismissed any such depressing thoughts, in the ecstasy of that night with Peter. He was once again her gentle, adoring lover, who laughed delightedly at her quaint remarks and gestures, and told her how much he had accomplished during the three days since she had seen him. On either of them referred again to the harsh words of their last meeting, and they each believed that the experience was erased as completely as the day itself that had slipped into the past of tomorrow. Yesterday. She lay in her arms and heard the deep resonance of his voice with sweet content, lost herself in his ardent kisses and dreamed again of that happy day when they would be together forever.

Camilla would have preferred to decline the invitation for Saturday evening, but she recognized the obligation as another of those unpleasant duties which she would be called upon to meet many times in the course of her career as Peter's wife. Like him—she would have to serve his public. The more famous he became, the more public would be his private life. But any duty became a pleasure when it involved being with Peter's wife, which position more women would envy her as he advanced.

Avis was one of the first of these. Camilla knew that. She never had been particularly fond of Avis Werth, and her very obvious personal interest in Peter did not diminish her aversion to the other girl. It might be flattering to Peter to have other women adore him, but it did not make life more secure for his wife.

Camilla told herself that such a condition should also be flattering to her—that this man whom other women coveted had rejected her from all life. But that was just the trouble, exactly, her caution reminded her. For all his life would probably be for a long time, and there was always a chance.

The studio party was a magnificent gesture to make an impression upon each and every guest for a long time to come. Most of them being the kind who had grown immune to impressions. It probably failed in that respect, with two exceptions. And those two were the most important targets at which Avis was aiming—so that was all right.

One was Peter, for every woman who is in love will exert herself to the utmost to impress the man she loves. The other was Camilla, who was much more accustomed to expensive displays than Peter; but Avis especially wanted to impress Camilla with the fact that she now held the advantage over her with respect to having money for anything she might wish to do. She did. Camilla knew that although she now felt financially secure about providing for herself, even that said to which she regarded as very good for a beginning was only a mite as compared to the cost of Avis' party.

## Best for You and Baby Too

**Baby's Own Soap**  
It's fragrant lather soothes & cleanses Individual Carbons

The guests were many and varied: Avis' own social group, art students and critics, established professionals, favorite models, tenants of both the Craft building and the Annex. They drifted in and out all the long evening, danced, ate, drank and made merry, with the generous encouragement of the hostess and her beverages.

For effect and approbation, she had selected several paintings and sculptured pieces from the most distinguished of her guests for a private exhibit. They added to the attractions and assured her the approval of the leaders of her adopted profession as a patron of the arts, at least.

To a certain extent, her efforts toward the producers and the market, and one sale did actually culminate from the affair.

Avis was stunning in wide-mesh black net, like delicate spider-webs that more revealed than concealed her white shoulders and modest form and net-clad ankles below the long, full skirt that left the line of her figure half way down to swirl in a clinging fullness as she moved gracefully among her guests.

She held most of the time to Peter's arm, having taken possession of him as soon as she arrived and saying sweetly to Camilla, "I'm sure you won't mind if I give Peter a little the better of this evening. He needs to know people—the kind of people who are here to-night, and I want to be sure he meets everyone and they remember who he is. I want everyone to know you, too, but you already know more of them than Peter does. He's the kind of one who has to make an impression with the right people, if he is going to succeed." She inclined her head toward a group across the room and lowered her voice, "I especially want him to meet my uncle, Mr. Danforth, who is one of the judging committee for the National exhibit. I'll introduce you later, my dear."

As a matter of fact, she failed to do so, but Camilla gave no thought to it. She was just as anxious for Peter to meet Mr. Danforth as Avis was.

She smiled a generous approval of her hostess' plans. "Of course, I want you to introduce Peter to everyone. Is there anything I can do to help you?"

"Indeed there is. Help everyone you know to get acquainted with everyone else. There's Terry over there," she added significantly. "I know he will be delighted to see you again."

Terry was delighted, and expressed his pleasure in no uncertain words and gestures. He took possession of Camilla much as Avis had done with Peter. Camilla wore a sister frock of cherry, with cut crystals for ornaments, and more eyes followed her about on Terry's arm than noticed Avis and Peter.

But Avis gave no heed to that, if she noticed it at all. It was Peter's attention which she sought, and held throughout the evening. Except to those who knew he was married, she made no reference to his wife, and Peter did not note the omission. He was gravely anxious to make that impression for which Avis was striving, grateful for her for her unselfish interest and earnestly convinced that she was doing him a very generous favor.

Mr. Danforth was a solid little man

with a handsome head and a Van Dyke beard, who inspected Peter's height with evident approval and appeared to be adequately impressed. Avis must be sure that he would not forget Peter.

"Uncle John, I want you to know Peter Anson," she explained distinctly. "He is that favorite pupil of Professor Drake's, who finished National this year and is entering a place in the Paris scholarship exhibit. I told you about him before."

"You shouldn't tell him everything you know about me," Peter chided her with good humor. Danforth clasped his big hand firmly. "Yes, indeed, it is a pleasure to know you, Mr. Anson. I look forward to seeing your work. Avis has spoken of you often, in fact, every time I have seen her recently," he laughed. His manner might have implied that Peter was not a married man, and an object of Avis' affections.

But no one heeded that, and the two men entered into an amiable discussion of sculpture, with an interested comment or two from Avis. She was clever enough not to stress too much her interest in Peter's exhibit entry — her objective was to have Peter himself impress his charming personality upon her relative who would hold one of the votes which should determine Peter's future career.

(To Be Continued)

## Has Faith In Theory

Young Research Worker Believes Revivification May Be Possible

The pink tongue of a dog, revived from death, lapped eagerly as milk was poured into its mouth and Dr. Robert E. Cornish said he hoped the animal's increasing strength eventually would enable it to survive and thereby advance his revivification experiment to aid mankind.

Dr. Cornish, young research worker at the University of California, believes his theory of revivification some day may be applied successfully to human beings who have died from heart failure, shock, submersion and asphyxiation.

"I hope the dog's brain eventually will become restored to the condition it was before death," Dr. Cornish said.

"The dog was dead four minutes by medical standards. It was asphyxiated, the heart had stopped beating, it ceased to breathe and its blood had halted its circulation. There is no question the dog was dead."

"Then I injected heparin to start its heart and defibrinated blood into its veins and within a minute its heart was beating."

Genius At Calculation

Seven-Year-Old English Boy Has Uncanny Gift

Try this for a mental sum—multiply 354,489,512,896 by nine! You may not be able to do it, but the seven-year-old Leon. Beason, of Barnfield L.C.C. School, Burnt Oak (Middlesex, England), can. Without pencil or paper to help him, he rattled off the answer 3,190,406,518,064, within eight minutes. He has been two years at school, and while other children are, stammering out their "9 times 6s," he is dabbling in millions. His calculating genius is not inherited. "I counted the first five figures and then I had the answer," he said. "Then I counted the next five and remember them and so on."

Then he takes all the figures which he has photographed in his mind and pieces them together in a panorama of millions. And he can repeat the answer backwards!

Can you remember what calamity you were dreading a year ago?

"It Helps Me!"

That's what 98 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more strength before and after childbirth, and makes life seem worth living again.

Induces Conversation

A man may be a dub in business, in finance or industry, but it is very rarely that he cannot participate in a discussion as to whether his partner had his hand properly or whether he should or should not have taken on a certain horse. In fact, we can think of nothing so productive of varied and animated conversation as a game of bridge.

Of German invention is a tiny padlock to be sewed inside a coat to fasten it against theft on a closet bar or hook.

## Too Much "Party" Last Night

Too Much Food, Late Hours, Smoky Atmosphere

## YET—This Morning No "Acid Headache"—No Upset Stomach

Scientists say this is the QUICK-EST, SUREST and EASIEST way to combat FEELING THE EFFECTS of over-indulgence—the most powerful acid neutralizer known to science. Just do this:

**TAKE—2** tablespoonfuls of Phillips' Milk of Magnesia in a glass of water **BEFORE** bed. In the morning take **2** more tablespoonfuls with the juice of a **WHOLE ORANGE**. That's all! You'll feel great!

Or take the equivalent amount of Phillips' Milk of Magnesia tablets. Each tablet is equal to a teaspoonful of the liquid.

Get genuine Phillips' Milk of Magnesia in the familiar liquid form, or the new, marvelously convenient tablets. Be sure it's PHILLIPS the kind doctors endorse.

## Little Helps For This Week

"For this is the will of God, even your sanctification." 1 Thessalonians 4:3.

Between us and Thyself remove Whatever hindrances may be, That so our inmost heart may A holy temple, meet for Thee.

Bear in the presence of God to know thyself. Then seek to know for what God sent thee into the world, how thou hast fulfilled it, art thou yet what God willed thee to be, what yet lacketh unto thee, what is lacking to thee now, what thing thou mayest now do by His grace to obtain His favor and approve thyself unto Him. Say to Him "Teach me to do Thy will for Thou art my God," and He will say unto thy soul, "Fear not, I am thy salvation." He will speak peace unto thy soul. He will set thee in the way: He will bear thee above praise of men and things which perish in thy grasp, and give thee, if but afar off, some glimpses of His own unfading unsetting unperishing brightness and bliss and love.

## Golf Club Officers.

At the reorganization meeting of the members of the Golf Club the following were elected officer—

Pres., F. W. Yeats  
V-Pres., Dr. Walton  
Secretary, D. Moyer  
Committee, Geo. Oppert-  
hanser, W. Lewis, Dr. Oatway  
The season's fees have been set at: Gents \$2.50, Ladies \$1.50.

The opening date will shortly be announced.

## Stony Plain and District

Mrs H. Landsman had as a visitor on Tuesday Mrs. Andy Brass of Duffield.

Mrs. Jac Armbruster, who had been on a visit here with friends, left Tuesday for her home in Vernon.

Monday, Arbor day, seen the pupils at the Public and High schools engaged in clean up manoeuvres, under the leadership of the teachers.

Mr Wm Kelly on Monday received a wire announcing the death of his father James Kelly, at Kimberley, B. C. Deceased was at one time a resident of Stony, having come here from Glasgow, Scotland, about eight years ago. Mr Kelly left for Kimberley on receipt of the message.

Another consignment of Chevrolet sedans and coaches is due this week at the Service Garage.

BUTTER AND EGGS WANTED at The Royal Cafe.

## Week-end Excursions.

Special "coach" excursions have been arranged by Canadian National Ry. for the week end of May 11, 12, 13, 14 in order to give people an opportunity of traveling to out side on excursion fares. These fares cover trips to Jasper, Mountain Park, Lloydminster, Lovat, Drumheller and intermediate points.

## Liquor Prices to Be Lowered.

Good news for toppers comes this week with the announcement of a reduction in liquor prices at the Gov't Vendors stores. The reduction will be made on brands imported from within the British Empire. The cause for the lowering of prices on Empire goods is the reduction by the Dominion Gov't of the special import duty from 3 to 1 1/2 p.c. This figures out to about 5c. on a quart bottle; this saving will be passed on to the purchaser with the addition of another 5c. making a net reduction of 10c a quart.

## Duffield Doings.

A reorganization meeting of the Duffield Sporting Club was held on Saturday last, the 5th at the home of Mr. Egan. The following officers were elected:

Pres., A. Perry; Hon. Pres., P. Faulk; Sec.-treas., Andy Brass; Committee, Wm. Hel-  
lum, W. Egan, G. Collins, Mrs. G. Tyrrel, Miss M. Colling-  
ridge.

The club now has a membership of 33. A new ball park has been secured; and also 2 new horseshoe courts, on the latter of which tournaments are now being held.

Preparations are already under way for the holding of town's annual picnic to be held this year on Saturday, June 23.

## Mother's Day, May 13.

The pupils of the United Church Sunday school will take the service on Mothers' Day, Sunday next, May 13th, at 7.30 p. m., including the pageant "Happy Families in Friendly churches"

## New Gasoline Stand.

The possibility of the town having another gasoline servicing station for motor vehicles now appears to be a strong possibility, as Mr. John H. Miller, a garageman well-known in this district, has about completed arrangements for a commencement to be made on his station at the corner of 2nd ave. and Main St. Besides the main building there will be an oiler and wash shad and 3 gas pump. As this corner has an elevation much higher than the surrounding pavement, some excavating and grading will be found necessary, to bring it down to the proper level.

This will prove to be a very convenient corner for motor drivers coming in to town; and as Mr. Miller is well known and proved to be a successful business man here before, no doubt he will be well patronised when he opens up.

## UFA Junior Groups to Meet.

The annual Farm Young People's week will be held this year at the University from Wed. June 6 to Tues. June 12, when delegates from Junior organizations of the UFA will gather from all parts of the province. An unusually large attendance is expected this year. Special Senior courses will be offered in English literature and history for boys; for girls, glove making, photography, folk dancing and dramatics.

## Fishing Season Opens on 16th

The 1934 fishing season opens Wed. next the 16th. This date applies to fishing for Perch, Pike, Pickerel, Goldeye; and for trout in North Saskatchewan and Red Deer rivers and Cold Lake. The fee for non-residents is \$2.25. Residents do not require a permit to fish for Perch, Pike, Pickerel or Goldeye; residents must pay a fee to fish for other classes of the finny tribe.

## Lights on Wagons.

The amending bill to the Vehicles and Highway Traffic act providing for the use of lights or reflectors on cars on main and other highways in Alberta, came into effect on Tuesday. The act sets forth the requirements for carrying lights on horse-drawn and other vehicles.

## Junior Farm Clubs.

Junior farm clubs in the province will be more numerous than ever this year, the demand for this class of agricultural extension work having grown tremendously in the past few years. There will be over 50 wheat clubs, an increase of 45 from last year, and in all about 110 seed grain clubs, and about 100 live stock clubs of which about 70 will be swine clubs.

## Novelty Dance!

## Heard at the Bake Shop.

Pete—What's all that noise next door?  
Bill—Oh, that's the barber getting himself a shave.  
Pete—What's the conversation?  
Bill—Well, y'see he's trying to persuade himself to have a shampoo.

## Spruce Grove News.

Mr and Mrs. R. N. Sherwin entertained friends at a bridge party on Friday Evg. Among those present were: Mr & Mrs. John Miller, Mr & Mrs. W. J. Connolly, Mrs. E. Stone, Mrs. Hunter, Miss Phyllis Hunter. Mr. Bert Hunt Prize winners: Ladies, Miss P. Hunter; gents, W. J. Connolly.

"Sport" Cleending paid a flying visit to the Grove on Monday.

Mr J. R. Evans, of Western Loan & Savings Co., accompanied by Prince Galatzine, were business visitors to the Grove on Saturday last.

Preparations are now under way to construct a new High school building some time this month. The exact location has not yet been decided on.

Mr F. Waulbaum, traveling agent for Woodland Dairy, was a business visitor to Spruce Grove on Friday. Accompanied by Mr. McKean Sr., he motored up to Duffield.

Posters are out for the big novelty dance sponsored by the Spruce Grove Community League, to be held at Winterburn hall the evening of Friday, May 18, with the admission for gents 50c. There will be numbered admission tickets, and a drawing for prizes will be made, the prizes to be awarded the holders of the lucky tickets.
